PROFESSIONAL SUMMARY

Java Backend Developer with 3.5+ years of experience building scalable microservices and REST APIs using Spring Boot, RabbitMQ, and MySQL. Skilled in designing event-driven, fault-tolerant systems and deploying production workloads on AWS. Seeking a backend engineering role at a product-based company.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Frameworks: Spring Boot, Spring Security, Spring Batch, Hibernate, React.js

Architecture: Microservices, RESTful API Design, Event-Driven Architecture, JWT Authentication

Databases: MySQL (Schema Design, Query Optimization, Stored Procedures)

Cloud / DevOps: AWS EC2, Docker, Jenkins, CI/CD, Maven, Git

Messaging: RabbitMQ (Async Messaging, Event-Driven Architecture)

Practices: Agile/Scrum, TDD, OOP, Code Review, Production Support

PROFESSIONAL EXPERIENCE

Relevantz Technologies — Client: Tata Communications Ltd | Chennai, India

Dec 2025 – Present

Software Engineer

- Architected fault-tolerant Spring Boot microservices for an enterprise platform, ensuring 99.9% uptime for millions of end-users.
- Built event-driven communication between 10+ services using RabbitMQ, increasing system throughput by 35%.
- Optimized MySQL schemas, stored procedures, and multi-table queries, cutting query execution time by 30% for reporting workflows.
- Secured REST APIs using Spring Security and JWT authentication, eliminating unauthorized access vectors.
- Led peer code reviews and authored technical documentation, reducing onboarding time for new engineers by 20%.
- Resolved production incidents through root-cause analysis, reducing repeat failures by 40% month-over-month.

Solverminds Solutions and Technologies | Chennai, India

Jun 2022 – Oct 2024

Associate Software Engineer

- Led development of a Requisition Management System (Java, Spring Boot, JSF, MySQL) serving 300+ enterprise users, achieving a 97% customer satisfaction rating.
- Implemented Spring Security-based authentication and role-based access control across 5 enterprise applications, securing 10,000+ records.
- Improved application performance by 40% by redesigning MySQL schemas and optimizing queries with the DBA team.
- Integrated REST APIs with Angular frontend, reducing data-fetch latency by 25% and eliminating 3 recurring integration bugs.
- Automated SQL reporting scripts, saving 15+ analyst-hours per month and reducing reporting errors to zero.
- Drove Test-Driven Development practices, achieving 85%+ unit test coverage and cutting post-release defect rate by 30%.

EDUCATION

Bachelor of Engineering, Electrical & Electronics Engineering

K. Ramakrishnan College of Technology, Tamil Nadu, India | Jun 2016 – Nov 2020

CONTINUOUS LEARNING

Data Scientist with Machine Learning Program — LogicMojo | Jun 2025 – Mar 2026

Completed modules in Python, Pandas, NumPy, Data Visualization, Power BI, Probability & Statistics, and Machine Learning.
